

AMENDMENTS TO THE SPECIFICATION

Please amend the disclosure as indicated hereafter.

Please amend the paragraph starting on p. 4, line 4 as follows:

Briefly described, in architecture, the system can be implemented as follows.

al
Local application sharing logic is configured to receive events to be shared from a local application and transmit said events to be shared to remote application sharing logic. The remote application sharing logic is configured to receive the events to be shared and to transmit the events to at least one corresponding remote application for processing. Transparent synchronization logic is configured to ensure transparent synchronization of the local application with said at least one remote application.
